

If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant or other financial adviser. Shares are offered on the basis of the information contained in the Prospectus, this Supplement and the documents referred to herein.

The Directors of BDT Invest Funds p.l.c. (the “Company”), whose names appear in the Prospectus, are the persons responsible for the information contained in the Prospectus and this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of the information. The Directors accept responsibility accordingly.

Neither the admission of the Shares of BDT Invest Emerging Markets Focus Fund to the Official List, nor the approval of this document pursuant to the listing requirements of the Irish Stock Exchange, shall constitute a warranty or representation by the Irish Stock Exchange as to the competence of service providers or any other party connected with the Company, the adequacy of information contained in this document or the suitability of the Company for investment purposes.

BDT Invest Funds p.l.c.

(an open-ended umbrella type investment company with variable capital incorporated with limited liability under the laws of Ireland, registered number 335843)

BDT Invest Emerging Markets Focus Fund

SUPPLEMENT TO PROSPECTUS

Investment Manager

BDT Investment Management Limited

Dated 29th September, 2005

Distribution of this Supplement is not authorised in any jurisdiction unless it is accompanied by a copy of the most recent annual and any subsequent semi-annual report of the Company. Such reports, the Prospectus and this Supplement together form the Prospectus for the issue of Shares.

BDT Invest Emerging Markets Focus Fund is a sub-fund of BDT Invest Funds p.l.c., an investment company with variable capital currently regulated pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2003 (S.I. No. 211 of 2003) as amended by the European Communities (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2003 (S.I. No. 212 of 2003) or any amendments thereto (the “Regulations”). The Company is structured as an umbrella fund in which different funds may be created from time to time with the prior approval of the Financial Regulator. The Base Currency of the Fund is U.S. Dollars. Three other sub-funds are currently established in the Company, namely, BDT Invest Asian Focus Fund, BDT Invest Japanese Smaller Companies Fund and BDT Japanese Focus Fund.

The Dollar Shares, the Sterling Shares and the Euro Shares of BDT Invest Emerging Markets Focus Fund have been admitted to the Official List of the Irish Stock Exchange. The Directors do not expect a secondary market to develop in any of the Shares of the Company.

A description of BDT Invest Funds p.l.c., its management and administration, fees and expenses, taxation and risk factors is contained in the Prospectus.

The Investment Manager is entitled to charge a redemption charge on the redemption of B Shares of up to 3 per cent. of the redemption price depending upon their date of acquisition. No redemption charge is payable on redemption of the A Shares. An investment in the Fund should be viewed as medium to long term.

This Supplement relates to BDT Invest Emerging Markets Focus Fund and forms part of the Prospectus. This Supplement must be read in the context of and together with the Prospectus. The Supplement and the Prospectus together comprise listing particulars for the purposes of the application to list the Shares of the Company on the Irish Stock Exchange. In particular, investors should read the risk factors set out in the Prospectus. An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be suitable for all investors.

DEFINITIONS

In this Supplement the words and expressions listed below have the meanings set opposite them, except where the context otherwise requires:

“A Shares”	A Dollar Shares, A Sterling Shares and A Euro Shares;
“Base Currency”	the currency of account of the Fund which is US Dollars;
“B Shares”	B Dollar Shares, B Sterling Shares and B Euro Shares;
“Dealing Day”	each Business Day together with such other day or days as the Directors shall determine and notify to Shareholders, and further provided that there should be at least two dealing days per month;
“Dollar Shares”	A Dollar Shares and B Dollar Shares;
“Euro Shares”	A Euro Shares and B Euro Shares;
“Financial Regulator”	The Irish Financial Services Regulatory Authority;
“Fund”	BDT Invest Emerging Markets Focus Fund;
“Prospectus”	the prospectus of the Company dated 29 th September, 2005;
“Shares”	participating shares of no par value in the capital of the Company and which have been designated A Dollar Shares, B Dollar Shares, A Sterling Shares, B Sterling Shares, A Euro Shares and B Euro Shares with reference to the Fund;
“Sterling Shares”	A Sterling Shares and B Sterling Shares;
“Supplement”	this supplement and any addendum hereto made from time to time.

Unless otherwise stated, all capitalised terms shall have the same meaning herein as in the Prospectus.

Introduction

Six classes of Shares are available in the Fund, A Dollar Shares and B Dollar Shares which are denominated in U.S. Dollars, A Sterling Shares and B Sterling Shares which are denominated in Pounds Sterling and A Euro Shares and B Euro Shares which are denominated in Euro, all of which may be purchased and/or redeemed as described in this Supplement and the Prospectus. A single portfolio of assets is maintained for the Fund, which is invested in accordance with the investment objective, policies, powers and restrictions set out in this Supplement.

Investment Objective and Policy

The investment objective of the Fund is to achieve long term capital growth through investment in global equity markets.

The investment policy of the Fund is to invest primarily in equity and equity related securities (such as fixed or floating rate convertible bonds and warrants), although investment may also be made in bonds issued by corporate and governmental issuers and other forms of debt instrument (such as promissory notes which are freely transferable and certificates of deposit). The Fund aims to achieve absolute returns and will not be managed by reference to any equity or bond index or benchmark.

The Directors believe that the Investment Manager has particular skills in emerging market equities. In normal circumstances growth companies from these regions will comprise the substantial majority of investments held by the Fund. The Directors also believe that equity markets will remain volatile and that there may be prolonged periods when holding equities will not be in the best interests of the Fund. During such periods, the Fund may lower its equity exposure and invest in bonds issued by corporate and governmental issuers and debt instruments (such as promissory notes which are freely transferable and certificates of deposit). As set out in "Risk Factors" in Part I of the Prospectus, no issuer or rating criteria has been established for the debt instruments in which the Fund may invest.

For the purposes of the investment policy of the Fund, the Directors will adopt the widest possible definition of emerging markets, including but not limited to the countries included in the World Bank IFC definition of emerging markets. Investments in emerging market securities pose additional risks for investors.

With the exception of permitted investments in unlisted securities or investment by the Fund is restricted to the Recognised Markets on pages 42 to 44 of the Prospectus.

For at least three years following the first admission of Shares of the Fund to the Official List of the Irish Stock Exchange, the Directors will ensure that, in the absence of unforeseen circumstances, the investment objective and policy of the Fund will be adhered to. Any change within this period will require the prior approval of the Irish Stock Exchange.

Any change to the investment objective of the Fund or a material change to the investment policy of the Fund may only be made with the approval by ordinary resolution of the Shareholders on the basis of a majority of the votes cast at a general meeting. Any non-material change to the investment policy of the Fund may be made from time to time by the Directors, if they shall deem it in the interests of the Fund to do so. Any such amendments shall be subject to giving reasonable notice to the Shareholders to enable them to request the redemption of their Shares prior to the implementation of any change.

Efficient Portfolio Management

The Fund may employ techniques and instruments for efficient portfolio management transactions and/or to protect against exchange rate risks subject to the conditions and limits laid down by the Financial Regulator detailed on page 38 under "Part V: Financial Derivative Instruments".

A description of the main techniques and instruments that may be used for efficient portfolio management and/or to provide protection against exchange rate risks are set out below.

Forward Currency Contracts and Currency Options

Forward currency contracts and currency options may, at the Directors' sole discretion, be used to hedge some or all of the exchange risk/currency exposure arising as a result of the fluctuation between the currency in which the Net Asset Value per Share is computed and the currencies in which the Fund's investments are denominated. In addition, forward currency contracts and currency options may be used to protect the value of the currency of each class from the adverse movements of other currencies. Please see the section headed "Class Currency Hedging" below for further details.

Access Products

A Fund may employ access vehicles such as low exercise price warrants (which may be known as certificates or notes) in order to gain an exposure to particular security or markets. Low exercise price warrants held by a Fund for efficient portfolio management shall be cash settled, listed on a Recognised Exchange in the European Economic Area (EEA) (European Union, Norway, Iceland, Lichtenstein), Switzerland, Australia, Canada, Japan, New Zealand and the United States and shall be exercisable at any time over the life of the warrant. In addition, the underlying investment of a low exercise price warrant shall be one in which the Fund could invest in directly.

Warrants, Convertible Bonds and Convertible Debentures

A Fund may purchase warrants, convertible bonds and convertible debentures to provide an efficient, liquid mechanism for taking position in securities without the need to purchase and hold the security.

Other Financial Derivative Instruments

Whilst other financial derivative instruments such as options, futures, swaps, stocklending agreements and repurchase / reverse repurchase agreements have not been used by the Fund to date, there is a possibility that in the future such financial derivative instruments will be employed for hedging exposure to a market, sector or region. Further details of such instruments are set out on page 11 of the full Prospectus under the heading "Investment Objective, Policy and Restrictions - Financial Derivative Instruments and Efficient Portfolio Management". The Fund will not utilise financial derivative instruments which have not been included in the risk management process employed by the Company until such time as a revised risk management process has been prepared and filed with the Financial Regulator.

Investment and Borrowing Powers and Restrictions

The investment and borrowing powers of the Fund and the investment restrictions to which it is subject are summarised in "Part IV: Investment and Borrowing Powers and Restrictions" on pages 33 to 37 of the Prospectus.

Investment Process

The Investment Manager intends to employ, in relation to the Fund, bottom-up company specific analysis to identify growth companies around the world. By undertaking extensive, disciplined internal research and by utilising external contacts and networks, the Investment Manager is well positioned to identify investment opportunities for clients. In normal circumstances, investments in emerging markets will comprise a substantial proportion of the Fund.

Although the Investment Manager will seek to be pragmatic in the use of the most appropriate investment style for prevailing market conditions, over the long term it is believed that investments in the shares of companies offering the prospect of high growth will generate superior investment returns. The Investment Manager will seek to identify companies that will benefit either from exposure to favourable macroeconomic conditions or from a competitive advantage born out of proprietary technology or superior management strategy.

Share Class Denominations

The Shares are being made available to investors in six differently denominated classes for ease of subscription in three currencies to enable investors other than those whose assets are denominated in U.S. Dollars to gain exposure to the U.S. Dollar denominated asset class without the attendant foreign exchange costs and to enable investors to have access to a class with a Net Asset Value per Share denominated in the currency of choice of the investor.

In the interests of seeking the optimal protection of a Shareholder's interest, the Fund will, where practicable, engage in foreign exchange hedging transactions for each class (where the profits, gains, losses, costs, income and expenditure consequent upon such hedging transactions are allocated solely to the relevant class) which in no case should exceed 100 per cent of Net Asset Value of the relevant class. Foreign exchange transactions with respect to the Dollar Shares will be undertaken with a view to protecting the value of that class in U.S. Dollars from the adverse movements of other currencies. Foreign exchange transactions with respect to the Sterling Shares will be undertaken with a view to protecting the value of that class in Pounds Sterling from the adverse movements of other currencies. Foreign exchange transactions with respect to the Euro Shares will be undertaken with a view to protecting the value of that class in Euros from the adverse movements of other currencies. Performance among classes will, however, vary due to their different currency exposure. Investors should be aware that this strategy may substantially limit Shareholders of the relevant class from benefiting if the designated currency of the class falls against the Base Currency of the Fund and the currencies in which the assets of the Fund are denominated. The annual and semi-annual accounts of the Fund will indicate how transactions undertaken to provide protection against exchange rate risks have been utilised.

Risk Factors

Investors' attention is drawn to the risk factors set out in Part I of the Prospectus and in particular to those set out under the heading "Emerging Markets Securities Risks".

Cross Liability of Funds

All liabilities, irrespective of the Fund they are attributable to, shall (in the event of a winding up of the Company or a redemption of all of the Shares of a Fund), unless otherwise agreed upon with the auditors, be binding on the Company as a whole and, accordingly, liabilities of one Fund may be paid out of one or more other Funds. At the date of this document the Directors are not aware of any such existing or contingent liability.

Forward Currency Contracts

A forward currency contract is an agreement between two parties pursuant to which one party agrees to purchase or sell a fixed amount of a particular currency at an agreed price on a specified future date. Although the Fund may enter into forward contracts to minimise the risk of loss due to a decline in the value of a hedged currency, such transactions limit any potential gain that might be realised should the value of the hedged currency increase. The precise matching of the forward contract amounts and the value of the securities involved will not generally be possible because the future value of such securities will change as a consequence of market movements in the value of such securities between the date when the forward contract is entered into and the date when it matures.

The successful execution of a hedging strategy which matches exactly the profile of the investments of the Fund cannot be assured.

In addition, the Fund may enter into forward currency contracts which are not traded on exchanges and are generally not regulated. There are no limitations on daily price moves of forward currency contracts. Banks and other dealers with whom the Fund may maintain accounts may require the Fund to deposit margin with respect to such trading, although margin requirements are often minimal or non-existent. The Fund's counterparties are not required to continue to make markets in such contracts. There have been periods during which certain counterparties have refused to continue to quote prices for forward currency contracts or have quoted prices with an unusually wide spread (the price at which the counterparty is prepared to buy and that at which it is prepared to sell). Arrangements to trade forward currency contracts may be made with only one or a few counterparties, and liquidity problems therefore might be greater than if such arrangements were made with numerous counterparties. The imposition of credit controls by governmental authorities might limit such forward trading to less than that which would otherwise be optimal, to the possible detriment of the Fund. The Fund may from time to time enter into currency exchange transactions by buying currency exchange forward contracts for the purposes of efficient portfolio management.

Distribution and Reinvestment Policy

Dividends may be paid out of the net investment income and/or net realised and unrealised capital gains of the Fund.

Unless a Shareholder elects otherwise, any distributions will be applied in the purchase of further Shares (or fractions thereof) as applicable.

The Fund will normally go "ex dividend" on the next Business Day following 31 December in each year from and including 31 December, 2004, and the annual distribution will be paid to Shareholders on the register at the close of business on 31 December of that year, on or before 30 April in each year.

Payments of dividends to holders of registered Shares who opt for cash (rather than the purchase of further Shares as described above) will be made in the currency of denomination of the Shares in question by telegraphic transfer or cheque (sent at the Shareholder's risk) to such Shareholders at the relevant address in the register of Shareholders. In the event that Shares are held in joint names, dividends may be sent to the first named Shareholder appearing in the register.

Shares shall rank for dividends as and from the beginning of the accounting period in which they were issued.

No dividends or other amount payable to Shareholders shall bear interest against the Company. All dividends unclaimed after a period of six years shall be forfeited and shall revert to the Company for the benefit of the Fund.

Purchases and Redemptions of Shares

Dollar Shares, Sterling Shares and Euro Shares in the Fund may be purchased on each Dealing Day at prices in U.S. Dollars, Pounds Sterling and Euro respectively and calculated with reference to the Net Asset Value per Share of the relevant class.

The minimum initial investment in any class of A Shares is U.S.\$10,000 (or its equivalent in Pounds Sterling for the A Sterling Shares and Euros for the A Euro Shares). The minimum additional investment in any class of A Shares is U.S.\$2,500 (or its equivalent in Pounds Sterling for the A Sterling Shares and Euro for the A Euro Shares). The minimum initial investment in any class of B Shares is U.S.\$500,000 (or its equivalent in Pounds Sterling for the B Sterling Shares and Euro for the B Euro Shares). The minimum additional investment in any class of B Shares is U.S.\$100,000 (or its equivalent in Pounds Sterling for the B Sterling Shares and Euros for the B Euro Shares). The Directors may waive these minima at their discretion in respect of specific applications or generally.

Initial and redemption charges applicable to each class of Shares are set out below. The Investment Manager may, in its sole discretion, (i) pay all or part of the initial charge and all or part of any Investment Management Fees to introducing intermediaries or agents or such other persons as the Investment Manager may determine (ii) waive the initial or redemption charge for certain prospective investors based on factors deemed appropriate by the Investment Manager.

Shares in the Fund are redeemable on each Dealing Day at a price in U.S. Dollars for the Dollar Shares, Pounds Sterling for the Sterling Shares and Euro for the Euro Shares calculated with reference to the Net Asset Value per Share of the relevant class. The minimum residual holding following a redemption of Shares prescribed by the Directors is Shares with a value of U.S.\$5,000 (or its equivalent in Pounds Sterling for the A Sterling Shares and Euro for the A Euro Shares) in respect of any class of A Shares and U.S.\$500,000 (or its equivalent in Pounds Sterling for the B Sterling Shares and Euro for the B Euro Shares) in respect of any class of B Shares.

The detailed provisions governing purchases and redemptions of Shares are set out in "Part II: Issue and Redemption of Shares" on pages 24 to 29 of the Prospectus.

Investment Management Charges

Initial Charge

The Investment Manager is entitled to receive an initial charge on the issue of A Shares not exceeding 3 per cent of the subscription amount per A Share which is retained by the Investment Manager and out of which the Investment Manager may pay commission to agents or intermediaries. No initial charge is payable on the issue of B Shares.

Redemption Charge

The Investment Manager, in its sole discretion, is entitled to charge a redemption charge on the redemption (which, for this purpose, shall include transfers) of B Shares. Holders of B Shares seeking to redeem all or part of their holding may be charged by the Investment Manager a charge of up to 3 per cent of the redemption price when seeking to redeem those Shares within 12 months of the date they were acquired. The amount of such redemption charge will be reduced to 2 per cent where the B Shares being redeemed have been held for 12 months or over; to 1 per cent where the B Shares have been held for 24 months or over; and waived when the redeeming Shareholder has held such B Shares for 36 months or longer. Shares first subscribed for by a Shareholder will be deemed to be the Shares first redeemed by that Shareholder. No redemption charge is payable on redemption of the A Shares.

Investment Management Fee

The Investment Manager is paid by the Fund a basic investment management fee (the “Investment Management Fee”) in respect of the A Shares and the B Shares, which accrues on each Dealing Day and is payable monthly in arrears. In respect of A Shares, the Fund will pay a monthly investment management fee calculated at the rate of 1.5 per cent per annum of the Net Asset Value of the class of A Shares. In respect of B Shares, the Fund will pay a monthly investment management fee calculated at the rate of 0.90 per cent per annum of the Net Asset Value of the class of B Shares concerned.

Performance Fee

The Investment Manager is also entitled to receive in respect of the A Shares and the B Shares, a performance related investment management fee (the “Performance Fee”) payable in respect of annual performance. The Performance Fee is payable at the rate of 10 per cent of the amount by which the growth in the Net Asset Value per Share of each class exceeds the specified Performance Hurdle (as defined below). The Performance Fee accrues on each Dealing Day, is payable in arrears in respect of each Performance Period (as defined below) and is calculated in accordance with the rules set out below.

A “Performance Period” for these purposes means a period commencing immediately following the last day of the preceding Performance Period and ending on and including the next following Calculation Day. “Calculation Day” for these purposes means:

- (a) the last Business Day in each calendar year;
- (b) the date of termination of the Investment Management Agreement; or
- (c) such other date on which the Company, the Fund or class may be liquidated or cease trading.

The first Performance Period for all Shares will commence at the end of the initial offer period and end on 31 December, 2004.

In order for a Performance Fee to be payable in respect of a Performance Period, the Net Asset Value per Share of the relevant class on the last Business Day of the relevant Performance Period (the “Final Net Asset Value per Share”) must exceed the “Performance Hurdle” in respect of Shares of the relevant class. Where the Performance Hurdle is exceeded, the Performance Fee payable per Share of the relevant class is equal to 10 per cent of the amount by which the Final Net Asset Value per Share of the relevant class exceeds the Performance Hurdle. The total Performance Fee payable will be an amount equal to the Performance Fee per Share of the relevant class (calculated as above) multiplied by the average number of Shares of the class in issue during the relevant Performance Period.

The average number of Shares of the relevant class in issue during any Performance Period shall be calculated based upon the number of Shares of the class in issue on each Dealing Day during the Performance Period, taking account of the period of time for which such Shares were in issue during such Performance Period.

The “Performance Hurdle” for the first Performance Period of each class of Shares shall be U.S.\$10 in respect of the Dollar Shares, £10 in respect of the Sterling Shares and €10 in respect of the Euro Shares grown by the Performance Rate of Return calculated on the basis of the number of days elapsed in the first Performance Period.

The Performance Hurdle for subsequent Performance Periods is the Net Asset Value per Share of the relevant class on the last Business Day of the latest preceding Performance Period in respect of which a Performance Fee has been paid, grown by the Performance Rate of Return for each subsequent Performance Period compounded at the end of the relevant Performance Period.

The “Performance Rate of Return” for each Performance Period is calculated at the rate of 10 per cent per annum. It may be necessary to take into account the Performance Rate of Return for more than one Performance Period in order to calculate the Performance Hurdle for a Performance Period.

For the purpose of calculating the Performance Fee, the Net Asset Value per Share of each class will be calculated after deducting the Investment Management Fee for the relevant Performance Period described above and after adding back any net income distributed to Shareholders in respect of the Period since the payment of the last Performance Fee but without accounting for the Performance Fee payable by the Company in respect of the relevant Performance Period.

The Investment Management and Performance Fees will be calculated by the Administrator and verified by the Custodian. The amount of Investment Management and Performance Fees earned by the Investment Manager in respect of any Performance Period will be retained regardless of the subsequent performance of the Fund. If the determination of the Net Asset Value per Share of the relevant class is suspended on any Calculation Date, the calculation of the Investment Management and Performance Fees on that date will be based upon the next available determination of the Net Asset Value per Share and the amount of any Investment Management and Performance Fees accrued will be adjusted accordingly.

Performance Fees are payable on realised and unrealised capital gains taking into account realised and unrealised losses at the end of each calculation period. Consequently, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

The Investment Management Fee and the Performance Fee are exclusive of value added tax (if any). Further details are set out in the Prospectus.

Administration Charges

The Administrator is entitled to receive an administration charge and fees in respect of its duties as administrator and registrar. The administration charge accrues daily and is paid monthly in arrears at a rate of 0.20 per cent of the Fund’s assets (prior to deduction of the Fund’s liabilities) subject to a minimum monthly fee of U.S.\$5,750 plus value added tax (if any). In addition, transaction fees are levied in respect of its duties as Registrar at a rate of U.S.\$35 per transaction. The fees are exclusive of value added tax (if any). Further details are set out in the Prospectus.

Remuneration of the Custodian

The Custodian is entitled to receive fees accruing and calculated daily and paid monthly in arrears at a rate of 0.125 per cent of the Fund’s assets (prior to deduction of the Fund’s liabilities) subject to a minimum monthly fee of U.S.\$2,500. In addition the Custodian is entitled to charge the Fund U.S.\$75 in respect of the settlement of each investment transaction, along with other sub-custodian fees, expenses and charges which it will recover directly from the Fund. Further details are set out in the Prospectus.

Establishment and Other Expenses

The fees and expenses incurred in connection with the establishment of the Fund are not expected to exceed €20,000. Such fees and expenses will be borne by the Fund and amortised over five years. The Fund will also bear a proportion of ongoing operational fees and expenses of the Company, details of which are set out in “Part I: Fees and Expenses” on pages 14 to 15 of the Prospectus.
